

Ready To Transform Fairness In The Criminal Justice System?

Race-Blind Charging Solution is for you.

A designated AWS Advanced Consulting Partner, ScaleCapacity is a leading consulting firm specializing in justice and public safety solutions. Here's how we do it differently:

Unconscious bias can subtly influence decisions within the criminal justice system, often despite the best intentions of those involved. California's Penal Code Section 741 mandates race-blind charging processes to mitigate this bias. Our innovative solution ensures compliance with these regulations while streamlining the redaction and evaluation process, making it efficient, accurate, and transparent.

Automated Redaction

Leverages advanced AI and natural language processing (NLP) to automatically redact sensitive information from case materials, ensuring that race, ethnicity, and other identifying details are effectively removed.

2-Step Charging Evaluation

Facilitates a seamless two-step process: an initial race-blind evaluation followed by a comprehensive review with unredacted reports, helping prosecutors to make unbiased preliminary decisions.

Enhanced Fairness and Equity

By removing racial identifiers, our solution helps ensure that charging decisions are based solely on the facts of the case, promoting justice and reducing the impact of unconscious bias.

Compliance and Confidence

Meet all statutory requirements of Penal Code Section 741 with confidence, knowing that your process aligns with state-mandated guidelines and best practices.

As an AWS Advanced Consulting Partner, we bring deep expertise to every project. Our AWS Cloud Skillsets include:

Competencies:

- AWS Generative AI
- DevOps Consulting
- Digital Workplace Consulting
- Migration Consulting
- Education Consulting
- Data & Analytics Consulting
- Nonprofit Consulting

Deliveries:

- Amazon EC2 for Windows Server
- Amazon Connect
- AWS CloudFormation
- AWS Lambda
- Amazon EKS
- AWS Transfer Family
- AWS Glue
- Amazon RDS
- Amazon Kinesis
- AWS Control Tower
- AWS Config
- Amazon QuickSight

100+ AWS Certifications

Why ScaleCapacity?

ScaleCapacity's deep expertise spans across implementing innovative technologies and transformative strategies that enhance the efficiency, effectiveness, and equity of justice and public safety operations.

Efficiency and Accuracy

Drastically reduces the time and resources required for manual redaction, minimizing human error and ensuring consistent, accurate results. AI-driven redaction is validated to meet high standards of precision.

Customizable and Scalable

The solution is adaptable to various case types and volumes, from high-volume urban districts to smaller jurisdictions. It allows for customization to meet specific agency needs and integrates smoothly with existing case management systems.

Operational Efficiency

Save time and resources with automated redaction, enabling your team to focus on more critical aspects of case evaluation and prosecution.

Data-Driven Insights

Collect and analyze data on the race-blind process, contributing to broader research efforts and informing policy decisions with empirical evidence.

Why is this the right solution?

Race-Blind charging solution upholds the fairness of our criminal justice system by eliminating the vulnerability of criminal charging decisions to unconscious bias.

AI-driven redaction allows the agencies to use their existing staff headcount with minimal training to meet the mandate and uphold high standards of precision and reliability.

Highly configurable to fit your workflows and needs.

Quick to implement because our solution includes core AWS building blocks such as:

- Amazon Bedrock
- Amazon Machine Learning
- Amazon Textract
- Amazon Opensearch
- AWS Lambda

ScaleCapacity is a leading consulting firm specializing in justice and public safety solutions.

Our expertise spans across implementing innovative technologies and transformative strategies that enhance the efficiency, effectiveness, and equity of justice and public safety operations.

"Unfortunately, we know the criminal justice system is not infallible and charging decisions are vulnerable to unconscious bias"

— State Attorney General Rob Bonta
