

CASE STUDY – City of East Point

PROBLEM STATEMENT

The aim was to develop a solution which could be right means of information for the citizens of the city. It would be reliable and guide them with proper instructions. It would also enable them to complete government procedures being home. In addition to this provide IT services for the In house employees.

SOLUTION HIGHLIGHTS

We proposed a solution based on Amazon Connect and AWS Lambda. We planned out the services and flow for information that we wanted to deliver.

- Greet the Employee by identifying them from their Phone Number.
- We interacted Amazon Connect and LEX for Fully automated flow of system with no agent setup.
- Built a Help desk, In Covid terms for IT department.
- Add on to this we worked on voice mail with Transcribe for Email and SMS.
- Log Voice ticket for Query and send audio note in email.
- AWS Lambda integration to work with other services like fetching employee names from Database.

About City of East Point

Industry:

The Administration Division of East Point establishes the vision, mission, and objectives for the City. Working in conjunction with the senior leadership team, the Director develops a strategic technology plan, establishes a budget and executes initiatives designed to enhance productivity complies with various regulatory mandates and meets the needs of citizens and businesses.

Challenges:

City of East Point Administrative department in this challenging COVID-19 time wanted a solution where the citizens of the city can reach out for particular information and also fill out governmental forms. They also wanted to give citizens information about Hospitals and its availability.

WHY AWS

Choosing AWS for implementing this solution is because AWS offered option to interact easily with LEX and Connect. AWS Services provided the best option to match use case requirements.

WHY customer selected ScaleCapacity, Inc
